Phosphagenics Receives a Further Arbitration Process Update from SIAC

23 October 2018, Melbourne: Australian drug delivery company, Phosphagenics Limited (ASX: POH; OTCQX: PPGNY) has received a further update from the Singapore International Arbitration Centre (SIAC) as follows:

"We note that the Tribunal submitted the draft award to SIAC, and we have now returned the same to the Tribunal today. Once the Tribunal has reviewed SIAC's comments and has finalized the award, we will issue it to the Parties."

In previous correspondence, SIAC indicated that:

"The Tribunal has informed SIAC that we should expect the draft award shortly. We will continue to correspond with the Tribunal and update the Parties on the status of the draft award, as soon as we have further information."

"Upon receipt of the Tribunal's draft Award, we will of course, endeavour to expedite the scrutiny which typically takes at least three weeks, subject to the circumstances. Upon completion of the scrutiny, we will return the reviewed draft to the Tribunal for consideration and/or finalization."

Neither SIAC nor the Tribunal (Arbitrator) has indicated when the parties may receive the Final Award.

Phosphagenics will continue to keep the market informed of further progress as required.

About Phosphagenics

Phosphagenics Limited is focused on developing and commercialising innovative Human Health, Animal Health and Personal Care products using its proprietary drug delivery system called TPM[®] (Tocopheryl Phosphate Mixture). TPM[®] is derived from

Vitamin E using a unique, proprietary and patented process and has been proven to enhance the solubility and oral, dermal and transdermal absorption of drugs and nutrients.

Amongst its major projects, Phosphagenics' is developing TPM[®] enhanced patches, gels and injectable products for the human health market and is also developing TPM[®] to enhance the feed efficiency and health of livestock.

Phosphagenics' shares are listed on the Australian Securities Exchange (POH) and its ADR – Level 1 program in the US is with The Bank of New York Mellon (PPGNY).

Inherent Risks of Investment in Biotechnology Companies

There are a number of inherent risks associated with the development of pharmaceutical products to a marketable stage. The lengthy clinical trial process is designed to assess the safety and efficacy of a drug prior to commercialisation and a significant proportion of drugs fail one or both of these criteria. Other risks include uncertainty of patent protection and proprietary rights, whether patent applications and issued patents will offer adequate protection to enable product development, the obtaining of necessary drug regulatory authority approvals and difficulties caused by the rapid advancements in technology.

Forward-looking Statements

Certain statements in this announcement may contain forward-looking statements regarding Company business and the therapeutic and commercial potential of its technologies and products in development. Any statement describing Company goals, expectations, intentions or beliefs is a forward-looking statement and should be considered an at-risk statement. Such statements are subject to certain risks and uncertainties, particularly those risks or uncertainties inherent in the process of developing technology and in the process of discovering, developing and commercialising drugs that can be proven to be safe and effective for use as human therapeutics, and in the endeavour of building a business around such products and services.
